

Note This extension will only be relevant to **South Africans**
it's a Loadshedding Schedule Checker Extension

Steps to get it to work

First press the button on the deck labeled "apply for get API key"
then 2 popup windows will appear

A window that you have to enter your API Key

And I a Window for your Town / Location

if you already know your Location's

Municipality and location number + Town

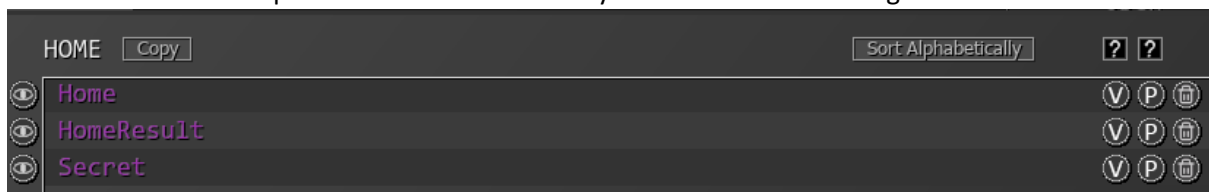

for example this →cityofjohannesburg -10-witkoppen

It's must always be lowercase letters

You can look that up if you don't wanna use your
Quota on the Eskom se Push app

If you don't know it press the button labelled "Only run this once"

within the commands press both CTRL + TAB and you will see the following within there

Next look inside one labelled HomeResult by pressing
the icon next to the name that looks like an eye
and you will see a bunch of results look for the one
that matches your town

you will see 3 results within the one that matches your home / town
Id ,name, region

Press the Icon that looks like a V on the ID of your home town
and past it in the button with the large Picture on it
on command 9 of that button you will see
Don't show "Secret" on stream it contains your API key

<https://developer.sepush.co.za/business/2.0/area?id=LocationID>

Remove the Location ID and paste in the ID of your home / Town in there

Next is to change every Instance of the the following commands lines

27, 28, 30, 40, 42, 43, 44, Basically everywhere it says BRB Screen and
Eskom in the button with the Huge Image

In the button Labeled "BROADCASTER ONLY TRIGGER" you will have to do that as well you will have to create a Text source on OBS for that and select that source in the green Eskom Places and places where it's blue as well and labelled BRB Screen

To make it trigger once every 30 Mintues Just run the button labelled "A BASIC TIMER"

If you use the chat command: **!ESKOM** can trigger the BROADCASTER ONLY TRIGGER button but you will have to edit the triggers for that
